

**MINIMUM DATA SUBMISSION REQUIREMENTS FOR THE
AEROSPACE NESHAP INFORMATION COLLECTION REQUEST**

ICR Form	Required for April 4, 2011 Submission	Allowable Variations in Submitted Data
Form A-1	All	None
Form A-2	All	None
Form B-1	Section I, Questions 1-3	
	Section II, Question 2	See Forms C-1 and C-2. If you provide total annual HAP emissions by emission point after control, then the control efficiency does not have to be provided in your initial response.
	Section III, Questions 1-5	
	Section IV, Questions 1-3	See Forms C-1 and C-2. If you provide total annual HAP emissions by emission point after control, then the control efficiency does not have to be provided in your initial response.
Forms C-1 and C-2		If you cannot provide the requested data for each coating and the breakdown of coating usage by spray booth, you must provide total annual HAP emissions from your coatings and allocate those emissions to specific emission points or spray booths. You may report the emissions as either before control or after control. If you provide emissions data before control, you must also provide the control efficiency of any control devices used on that emission point, including overspray filters when inorganic HAP emissions are reported.
Form D-1	Section I, Questions 2, 3	
	Section II	If you cannot provide the requested data for each tank, you must provide total annual HAP emissions from chemical milling and metal finishing operations and allocate those emissions to specific emission points. You may report the emissions as either before control or after control. If you provide emissions data before control, you must also provide the control efficiency of any control devices used on that emission point.

ICR Form	Required for April 4, 2011 Submission	Allowable Variations in Submitted Data
Form E-1	Section I, Questions 2, 3, 5	
	Section II	If you cannot provide the requested data for each blasting operation, you must provide total annual HAP emissions from blasting operations and allocate those emissions to specific emission points. You may report the emissions as either before control or after control. If you provide emissions data before control, you must also provide the control efficiency of any control devices used on that emission point.
Form E-2	Section I, Questions 2, 3	
	Section II	If you cannot provide the requested data for each depainting operation, you must provide total annual HAP emissions from depainting operations and allocate those emissions to specific emission points. You may report the emissions as either before control or after control. If you provide emissions data before control, you must also provide the control efficiency of any control devices used on that emission point.
Form E-3	Part A, Section I, Questions 1-6	
	Part A, Section II	If you cannot provide the requested data for each solvent cleaning operation, you must provide total annual HAP emissions from solvent cleaning operations and allocate those emissions to specific emission points. You may report the emissions as either before control or after control. If you provide emissions data before control, you must also provide the control efficiency of any control devices used on that emission point.
	Part B, Section I, Questions 2, 3	
	Part B, Section II	If you cannot provide the requested data for each fugitive solvent cleaning operation, you must provide total annual HAP emissions from fugitive solvent cleaning operations for each building in which these operations occur.

ICR Form	Required for April 4, 2011 Submission	Allowable Variations in Submitted Data
Form E-4	None	
Forms F-1 and F-2		If you cannot provide the requested data for each resin and the breakdown of resin usage by spray booth, you must provide total annual HAP emissions from your resins and allocate those emissions to specific emission points or spray booths. You may report the emissions as either before control or after control. If you provide emissions data before control, you must also provide the control efficiency of any control devices used on that emission point.
Form G-1	Section I, Questions 2-6	If you know the annual HAP emissions from any of the tanks, you may report the annual HAP emissions and complete only Section I, Question 3.
	Section II, Question 1, 2 (HAP component and mass fraction only)	
Form H-1	Section I, Questions 2, 3	If you know the annual HAP emissions from any of the tanks, you may report the annual HAP emissions and complete only Section I, Question 2.
	Section II, Questions 1-4	
Form I-1	None	
Form J-1 through J-10		Latitude, longitude, stack height, stack diameter, outlet temperature, flow rate (acfm), annual HAP emissions if not reported on another form
Form K-1	None
